

Incident Management Situation Report
Wednesday June 17, 2026 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (108 fires)
New large incidents:	9
Large fires contained:	2
Uncontained large fires:	21
CIMTs committed:	2
NIMOs committed:	0

Northwest Area (PL 2)**Fire Activity and Teams Assigned****Totals**

New fires:	16
New large incidents:	2
Uncontained large fires:	5
CIMTs Committed:	1

* **Upriver**, Northeast Region, Washington DNR. Started on private land one mile east of Spokane, WA. Timber. Active fire behavior with running, torching and uphill runs. Numerous residences threatened. Area, road and trail closures in effect.

* **Old Emigrant**, Pendleton Unit, Oregon DOF. Six miles southeast of Pendleton, OR. Grass and brush. Active fire behavior with running, wind-driven runs and flanking. Residences threatened. Evacuations in effect.

Tule Rd, Yakama Agency, BIA. CIMT (NW Team 2). Five miles south of Toppenish, WA. Grass and brush. Moderate fire behavior with creeping, smoldering and wind-driven runs.

Juniper Dunes, Spokane District, BLM. Ten miles northeast of Pasco, WA. Grass and brush. Active fire behavior with flanking and creeping. Structures threatened. Evacuations, area, road and trail closures in effect.

Twin Sisters, Washington State Fire Marshal's Office. Five miles south of Wallula, WA. Grass and brush. No new information.

KRN – Kern County Fire Department

Southern Area (PL 1)

Fire Activity and Teams Assigned

Totals

New fires:	5
New large incidents:	2
Uncontained large fires:	7

Quarry 2, Florida Forest Service. Six miles west of Doral, FL. Grass. Extreme fire behavior with running.

* **Well 13**, Florida Forest Service. Five miles west of Medley, FL. Dormant brush. Moderate fire behavior with flanking.

Rose Bay Canal, North Carolina Forest Service. Ten miles southwest of Fairfield, NC. Timber. Moderate fire behavior with smoldering.

Rookery, Lake Woodruff NWR, FWS. Three miles northwest of Deland, FL. Grass. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

* **Trail 13 09**, Florida Forest Service. Six miles southwest of Inverness, FL. Southern rough. Moderate fire behavior with running and flanking.

Shell, National Forests in Florida, USFS. Thirteen miles west of Deland, FL. Southern rough. Minimal fire behavior.

Green Gate 26, Florida Forest Service. Fifteen miles southeast of Immokalee, FL. Southern rough and grass. Minimal fire behavior with creeping and smoldering. Reduction in acreage due to more accurate mapping. Last report unless significant activity occurs.

TOTAL ACRES:		105,196	63,908	16,899	47,361	2,151,555	222,032	2,606,950

Ten Year Average	Quantity
Fires (2016 – 2025 as of today)	24,552
Acres (2016 – 2025 as of today)	1,587,226

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Widespread elevated to critical conditions will persist across much of the West today. Across these areas, variable winds between 15-25 mph and relative humidity values between 5-15% are expected, with gusts up to 35 mph across the Snake River Plain, northeastern Utah, southern Wyoming, and central Colorado. Breezy conditions will persist across the Northwest, but winds will be lower than yesterday. Temperatures nearing or exceeding 100 degrees are expected across the central California valleys and large portions of the Desert Southwest as well as the southern Great Plains and western Texas. Mixed wet and dry storms expected from northwest Arizona to southwest New Mexico today, with a chance for lightning across high elevations of the Sierra south of Tahoe later this afternoon into the evening.

In the eastern U.S., scattered showers and thunderstorms will continue from the Dakotas east across the Great Lakes Region and portions of the Northeast, as well as from the Gulf Coast of Texas through parts of the Carolinas, with the heaviest precipitation is expected across the Great Lakes region. Hot and dry conditions will accompany isolated storm potential across Florida leading to elevated conditions. In Alaska, moderate conditions are expected with a chance for wet storms accompanied by lightning. Over central eastern Alaska, relative humidity values as low as 25% are expected, but winds will be light, less than 10 mph.
